

A vital source of business news, information and data

The DJC has been serving the Northwest business community since 1893. Monday through Saturday, we reach thousands of business owners and decision makers in the Puget Sound region and across the Pacific Northwest. The DJC is the official newspaper for the City of Seattle.

It's more than a newspaper

Daily business and construction news and analysis are just the beginning. Contract awards, Bid solicitations, RFPs, building permits, business licenses, public notices, foreclosures, and much more, can be found in the DJC. The DJC is both an award winning newspaper and a serious source of regional business data.

DJC subscribers are building the future of the Pacific Northwest

They design, plan, finance, construct, insure, manage and repair our infrastructure - roads, tunnels, bridges, airports, schools facilities, commercial buildings, dams, utilities and other projects. The DJC is the best way to reach these decision makers.

Targeted marketing opportunities

Feature Pages

Each day has a focus that caters to specific interests. If you want to reach architects and engineers or the commercial real estate market, there is a page for you.

Special editions

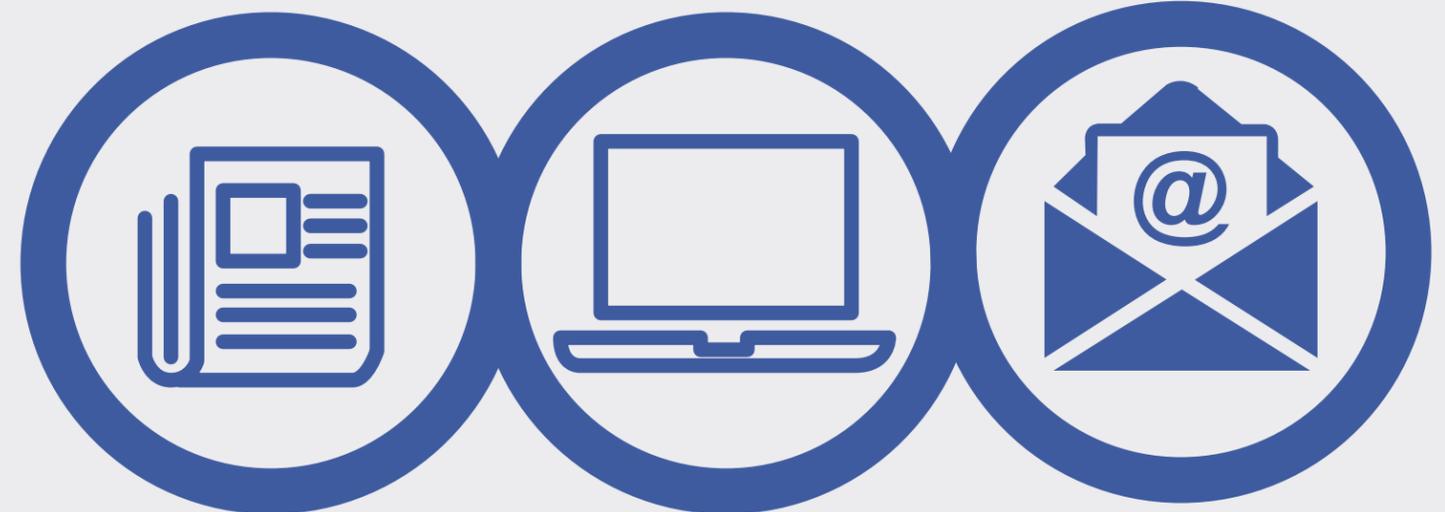

We publish special editions (10 to 20 per year) of extreme interest to our readership. Editorial focus ranges from sustainable building to architecture and engineering and the region's top construction projects.

Join the conversation

As Seattle's only daily business newspaper, the DJC reaches thousands of readers. These readers are highly educated professionals between the ages of 28 and 60.

To discuss marketing opportunities, print and online rates, and more, call our display advertising department at 206-622-8272 or email mattb@djc.com.
